## PRODUCT DESCRIPTION

The Shole Holecutter System comes with everything you need to ensure a perfect cup every time.

- **Shole Hole Cutter** - The Tacit Shole Hole cutter cuts an exact 108mm hole every time with an integral hammer action. With an upright operation, it is easy on the back, with a unique effortless core extraction system. The whole unit weighs less than 10kg! The bullseye spirit level makes sure every hole is cut level. It also comes with easy interchangeable compression / non-compression blades with an optional adjustable depth gauge.
- **Shole Shoe** - holds shole upright on green while working so that no mark is left on the green
- **Holecutting Board** - Holecutting board is made from Nylon to absorb the cutting action to enable precise hole cutting with the Shole hole cutter.
- **Depth Rings** - used to ensure the cutter goes to the same depth every time, no matter who uses it.
