CUSTOM STONE COURSE MESSAGING

Made in The USA

-- Stone-look tee signs, tee markers, directional signs, and entry monuments
-- Manufactured in resin-cast, concrete-cast, or precision-cut metal (select applications)
-- Choose the look: sandstone, granite, woodgrain, or smooth color finish
-- Designed for the outdoors: tough, long-wearing, and damage-resistant
-- Built from premium USA-sourced raw materials for consistent quality
-- From short runs to highly custom one-offs—every order can be customized
-- CAD-designed and fabricated with waterjet + CNC routing for clean, repeatable detail
-- Standard lead time: ~6 weeks (confirm at time of quote)

Par West helps you create course messaging that looks natural and reads beautifully without sacrificing durability. Our stone-style signs are crafted in the USA using high-quality resin or concrete mixes (or cut metal where needed) and finished to mimic sandstone, granite, wood, or a sleek smooth color. Every project is built from the ground up using computer-aided design, then precision-cut and routed with waterjet and CNC equipment for dependable results. We don't stock "one-size-fits-all" inventory. Your order is made to match your course, your branding, and your exact needs.

WHICH TINE IS RIGHT FOR YOU?

- **HEAT TREATED STEEL -** This is our normal tine material that gives you a good quality tine for an affordable cost. This may be a good option where you may hit gravel or rocks and the tine may break no matter what material it is.
- **CARBIDE TIP -** Hardened tip designed for lasting durability. The downside to carbide tip tines is that they may pull the turf up a little and they can wear out above the tip.
- **PHOENIX HARDENED STEEL -** These tines mean you don't have to choose between a long-life, durable carbide tipped coring tine or a clean efficient cut and core with a standard heat treated tine. Phoenix provides both including significantly reduced 'grow-in' period and rust resistance for longer life.

AERIFICATION DISPLACEMENT CHART

This chart can be used to help determine the amount material removed by varying tine size and spacing. Many factors can influence actual results, so use this chart solely as a reference.

TINE SIZE	1.25" X 1.25" SPACING	1.5" X 1.5" SPACING	2" X 2" SPACING	2.5" X 2.5" SPACING	5" X 5" SPACING

GOLFCO COMPETITION ROLLERS

Not all rollers are created equal. We believe Golfco competition rollers are the best in the market. Here are the reasons why:

- Common overhaul kit for all rollers (bearings, seals and retainers are the same). Sealed ball bearings that last without the need for re-greasing
- No need to grease - no grease stains on greens
- Is silent running on all surfaces
- Is very shock absorbing and impact resistant
- Resists debris buildup (superior to any metallic materials)
