SAFE-TEE WATER FILL SYSTEM

The Safe-Tee fill system converts your Igloo with a disposable liner that prevents contamination.

One of the biggest issues facing golf courses today is providing sanitary drinking water for their guests.

- There's no outside contact. Not with air. Not with human hands. Nothing
- Safe-Tee Water greatly reduces the labor needed to meet current water cooler sanitation requirements
- Alternatives are very expensive and have additional factors to consider:

STANDARD GOLF "THE CHIEF" RAKE
20" Head for Aussie Style Raking

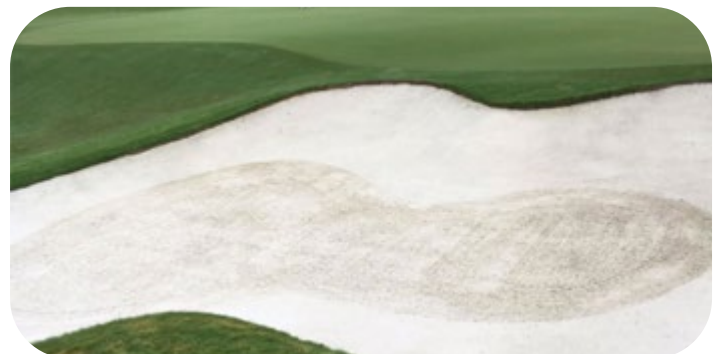

The newest bunker rake from Standard Golf is the first of its kind. The Chief is a two-in-one bunker rake perfect for the "Aussie Style" bunker.

One smooth side for rolling the vertical face of the bunker and a second side with ridges to scrape the bottom of the trap for a consistent lie. The result is a more consistent finish than traditional bunker rakes that leave deep plow marks in the playing surface.

Golf course superintendents are increasingly adopting the "Aussie Style" of maintenance in sand traps. The goal is to cultivate smooth, tight sand on the vertical areas of the bunker. This ensures balls that land here will not plug and roll back down to the bottom of the trap,

WHICH TINE IS RIGHT FOR YOU?

- **HEAT TREATED STEEL** - This is our normal tine material that gives you a good quality tine for an affordable cost. This may be a good option where you may hit gravel or rocks and the tine may break no matter what material it is.
- **CARBIDE TIP** - Hardened tip designed for lasting durability. The downside to carbide tip tines is that they may pull the turf up a little and they can wear out above the tip.
- **PHOENIX HARDENED STEEL** - These tines mean you don't have to choose between a long-life, durable carbide tipped coring tine or a clean efficient cut and core with a standard heat treated tine. Phoenix provides both including significantly reduced 'grow-in' period and rust resistance for longer life.

AERIFICATION DISPLACEMENT CHART

This chart can be used to help determine the amount a material removed by varying tine size and spacing. Many factors can influence actual results, so use this chart solely as a reference.

GOLFCO COMPETITION ROLLERS

Not all rollers are created equal. We believe Golfco competition rollers are the best in the market. Here are the reasons why:

- Common overhaul kit for all rollers (bearings, seals and retainers are the same). Sealed ball bearings that last without the need for re-greasing
- No need to grease - no grease stains on Greens
- Is silent running on all surfaces
- Is very shock absorbing and impact resistant
- Resists debris buildup (superior to any metallic materials)
- Diminishes transmigration of harmful elements such as disease or fungus
- Will not develop frost buildup
